# BREATHING APPARATUS SEARCH PROCEDURES

---

## COURSE OUTCOMES

---

Students will experience a fully interactive 1 day training session that explores internal search and rescue procedures with multiple scenarios.

## STUDENT GROUP

---

This course is aimed primarily at personnel in the role of a Firefighter within the aviation industry but is open to all local authority fire services and industrial fire services.

## PRE ATTENDANCE REQUIREMENTS

---

Due to the physical nature of this course, students are required to demonstrate prior to attendance that they have been medically assessed and deemed fit and able to undertake course activities including the use of breathing apparatus.

Accommodation can be arranged if required.

PPE can be supplied if required.

## COURSE CONTENT

---

At the completion of the course students will have knowledge of:

- Internal search procedures including directional and compartmental search patterns as per National Operational Guidance
- Methods of aircraft search procedures.

## AIM

---

To ensure that students are competent in BA search procedures.

Students attending this course will receive training in FF Role map Units:

- AFF5 Respond to operational incidents requiring breathing apparatus.

## ASSESSMENT

---

Students are continually assessed throughout the course.

## COURSE DURATION

---

1 day

## COURSE COST

---

£ 2,850.00 + VAT

## STUDENT NUMBERS

---

The course can accommodate up to 10 students at a time.
