# AVIATION INTERNAL FIREFIGHTING COURSE

---

## COURSE OUTCOMES

---

This course is designed to cover practical elements of MOC and MOS as per CAP 699 for:

- AFF4 Save and preserve endangered life at incidents
- AFF5 Respond to operational incidents requiring breathing apparatus
- Students will experience a fully interactive 1 day training session that explores internal aviation fires with multiple scenarios.

## STUDENT GROUP

---

This course is aimed primarily at personnel in the role of a Firefighter within the aviation industry but is open to all local authority fire services and industrial fire services.

## PRE ATTENDANCE REQUIREMENTS

---

Due to the physical nature of this course, students are required to demonstrate prior to attendance that they have been medically assessed and deemed fit and able to undertake course activities. All personnel must be fully competent in the use of breathing apparatus.

Accommodation can be arranged if required.

PPE can be supplied if required.

## COURSE CONTENT

---

At the completion of the course students will have knowledge of:

- Deployment and positioning of firefighting appliances at incidents
- Initial firefighting considerations.
- Correct use of sidelines/hose reels for internal firefighting
- Search and rescue procedures.

## AIM

---

To ensure that students are competent in the use of firefighting techniques to safely extinguish internal fires, save and preserve life at aviation fire scenarios.

## ASSESSMENT

---

Students are continually assessed throughout the course.

## COURSE DURATION

---

1 day

## COURSE COST

---

£3,500.00 + VAT

## STUDENT NUMBERS

---

The course can accommodate up to 10 students at a time.
